EDUCATION

DUKE UNIVERSITY, The Fuqua School of Business

Durham, NC

Master of Science in Quantitative Management: Business Analytics, Strategy Track

May 2026

GPA 4.0

Data Science Coursework: Applied Probability & Statistics (R), Programming for Data Analytics (Python), and Data Infrastructure

Domain Coursework: Business Communication, Business Fundamentals, and Strategic Management

UNIVERSITY OF TOKYO

Tokyo, Japan

Bachelor of Economics

Mar 2020

Organizing Committee, Nationwide Business Contest. Student Board Member, Economics Department.

EXPERIENCE

CENTRAL JAPAN RAILWAY COMPANY, Innovation and New Services Division

Tokyo, Japan

Project Coordinator

Jul 2022 – Jul 2023

- Spearheaded data-driven project to explore new services for the Tokaido Shinkansen (Tokyo-Osaka bullet train line), securing annual budget of \$40K and advocating for participation in the company's incubation center.
- Initiated and orchestrated six collaborative projects with nine companies, leveraging cross-company partnerships to drive innovation and improve customer experience.
- Led overhaul of the Tokaido Shinkansen app: designed new data collection and analysis plan, selected development vendor, and refined app functionality, reducing annual costs by \$150K and establishing daily collection of ~40K user data.

Project Assistant

Sep 2021 – Jun 2022

- Analyzed 30K+ passenger usage data for a new private compartment service, visualizing findings in advanced Excel reports that informed key Board decisions.
- Led onboard Wi-Fi portal management, conducting analytics to visualize passenger activities, laying the groundwork to enhance onboard services, and improving customer experience.

Trainee, Customer Service and Operations Training Division

Apr 2020 – Aug 2021

- Investigated and organized operational data; authored report exploring root causes of train infractions, shaping preventive measure education for train crews.

RACE GROUP, Business Process Improvement and Automation Division

Tokyo, Japan

Consulting firm providing HR and IT solutions

Oct 2018 – Mar 2020

Operation Improvement Intern

- Implemented internal business efficiency improvement project as part of launch team, creating 40+ automation programs using SQL and Robotic Process Automation (RPA) technology that automated ~100 hours of tasks monthly.

SELECTED PROJECTS

Identifying Causes of Train Infractions (R). Cleaned and processed ~30K operational data; built linear regression models to identify significant variables influencing train infractions. Authored detailed report and delivered presentation to executives, marking the first data analysis of its kind. Results were adopted to educate train crews on infraction prevention.

Developing In-Cargo Service Insights (Google Analytics 4 and Looker Studio). Implemented Google Analytics 4 on an onboard Wi-Fi portal site, collecting daily data from 10K+ users. Defined KPIs using GA4's event-based tracking model and visualized in an interactive dashboard via Looker Studio. Analyzed passenger behavior through user explorer reports, leading to initiation of six collaborative projects with nine external partners.

TECHNICAL CAPABILITIES

SQL, R (ggplot, dplyr, tidyverse, data.table), **Python**, **Google Analytics tools suite** (Google Analytics 4 (GA4) and Looker Studio), **Tableau**, **Statistical Methods** (A/B testing, hypothesis testing, linear regression, logistic regression, time-series analysis)

ADDITIONAL INFORMATION

Fluent in English, native Japanese. Relocated with family to the US in 2023. Volunteer Work: Implemented data collection projects for Welcome Baby Program sponsored by NC cooperative extension.
